

# Think like an **ARCHAEOLOGIST**

Archaeologists look closely at artifacts to see what they can learn about the past. You are going to think like an archaeologist by looking closely at the artifacts in front of you. Choose one, then answer the questions below about its **physical characteristics**.

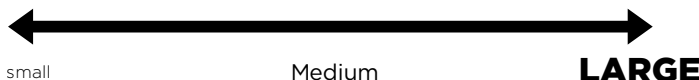

**Draw the artifact here:**

**What shape is the artifact?**

**What color is the artifact?**

**What size is the artifact? Mark on the scale.**

**What is the artifact made of? Circle all that apply.**

Paper

Stone

Wood

Glass

Leather

Metal

Ceramic

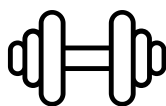

Plastic

Fabric

Other: \_\_\_\_\_

**What do you think the artifact feels like? Circle all that apply.**

Heavy

Light

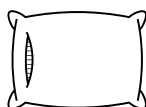

Smooth

Rough

Hard

Soft

**Have you seen this artifact before? Where?**

**What do you think the artifact was used for?**

**Who do you think would have used the artifact?**

**Could you still use it today? How?**

**What questions do you have about the artifact?**
